master s thesis from the year 2015 in the subject psychology clinical psychology  
psychopathology prevention grade b language english abstract the aim of the current  
paper is to discuss the negative along with positive effects of cannabis on health as  
well as the attitude changes of the individuals as to whether they are typical and  
ordinary or dysfunctional the objectives of the research study are the following a  
issues regarding its possible adverse effects on mood b the therapeutic potential of  
cannabis c check the dissimilarities on personality traits between chronic non chronic  
and non users d gender differences e check on depression stages amongst all three 3  
groups cannabis consumption can be controlled but in some cases individuals  
experience negative psychological and physical effects due to the fact that their habit  
turns into addiction many psychological studies linked cannabis use and schizophrenia  
as well as depression levels showing a weak significant association but at the time  
there are not strong considerable results to establish those findings this study  
supports the attitude change of heavy cannabis users in a psychosocial perspective  
but also giving evidence that cannabis can be used for therapeutic action as it has a  
potential role in the treatment of convulsive disorders neuroticism and gives assurance  
for future benefits in a great range of illnesses

this periodical edition includes peer reviewed scientific and engineering papers on all  
aspects of research in the area of nanoscience and nanotechnologies and wide  
practical application of the achieved results
